EQUINE AMINO ACID SUPPLEMENT

Promix Amino Acid supplement has been specifically formulated that, together with fair feed and good grass, it will supply all the amino acids that horses require to synthesize and utilize their protein intake.

Amino Acid supplementation will promote:

- ✓ Optimal energy levels
- ✓ Assisted prevention of muscle stiffness, spasms and tying-up
- ✓ Improved food utilisation
- ✓ Increased muscle development and mass
- ✓ Reduced water loss – nitrogen loss in sweat
- ✓ Assisted lactation and reproduction in brood mares
- ✓ Promotes growth due to high Lysine content

DOSAGE:

20 grams of Amino Acids both morning and night (40 grams per day), mixed into their regular feed, add a little cold water if necessary.

The dosage prescribed is for the average-sized horse (500 kg) under normal working conditions.

Increased dosages are recommended for:

- Horses in very taxing work
- Horses in extended travel
- Pregnant and lactating mares
- Infirm, ill and injured horses
- Covering stallions
